Asset Management Service: NKT offers rental of excellence

AMS provides necessary equipment to onshore and off-shore cable projects whether these are large scale turn-key projects or smaller repair works. Due to NKT' great experience with executing projects, services and repairs. AMS has the ability to quick and smooth mobilize and maintain the necessary personnel and equipment to the installation site of the concerned project/repair.

AMS owns and maintains our equipment ourselves. If specific tools or equipment is already rented out AMS has several external collaboration partners/suppliers who can assist us. This ensures that AMS is always capable of being on site with all necessary personnel and equipment in due time.

Hotline:
24/7 hotline

Certification:
All of AMS' equipment is certified on a yearly basis or prior to allocation to installation site

24

Mobilization:
Short mobilization time, down to 24h

Local legislation:
All of AMS' electrical equipment is certified according to local legislation

Safety and environment

“Safety first” is a core value of nkt cables and to meet this value all AMS rental equipment is certified according to local legislation. Furthermore all shelters are equipped with fire-fighting and first aid equipment.

In addition to the high priority of safety, NKT also has an eye for the environment. For example, a part of AMS's

rental equipment is environmental containers for oil recovery. These are used in connection with the scrap of oil cables to ensure that no oil is spilled into the environment.

Rental Equipment

- Rental of onshore shelters
- Rental of offshore shelters
- Rental of tool containers
- Rental of environmental containers for oil recovery
- Sales of equipment for freezing of oil cables (dry ice, boxes etc.)
